Valeriia Molchanova, EN→RU Game Localization Specialist

Summary

EN→RU game localization specialist with hands-on experience translating narrative, UI, and system content for a commercial RPG. Backed by 6+ years of working with international software products and English-language content, with a strong background in terminology, product context, and user-facing copy. Focused on natural Russian, consistent character voice, and technically accurate localization.

Translation: €0.03/word | Editing: €0.02/word

Experience

EN→RU Game Localizer, The Necromancer's Tale — Psychic Software

July 2026 – Present | Expected completion: November 2026

- EN→RU localization of a narrative-driven gothic RPG, including dialogue and other in-game text
- Adaptation of tone, character voice, and terminology for natural, immersive Russian
- Work with context-dependent strings, tags, placeholders, and other localization constraints

Earlier experience

International Marketing & Software

2020 – 2026

Luxand Inc. — Product Marketing | PIX Robotics — Marketing Specialist | SafeDNS — International Marketing Manager

- 6+ years working with English-language B2B products and international markets, including product/UI copy, technical content, and cross-cultural adaptation
- Developed extensive experience in cross-cultural communication, content adaptation, and consistency across user-facing materials
- Earlier EU-market work in English/French included client communication, product presentations, and localization
